

Availability status detailed	Data space used percent	Availability state	CPU used	App CPU percentage
Sessions count	Full backup storage size	SQL Server process core percent	Percentage CPU	App memory percentage
Tempdb log file size	Log backup storage size	Log IO percentage	CPU limit	
Tempdb log used percent	Differential backup storage size	Connections blocked by firewall	Connections successful	
Tempdb data file size	Data space allocated	Deadlocks	Connections failed: System errors	
In-Memory OLTP storage percent	Sessions percentage	Data IO percentage	Workers percentage	
Data space used	SQL Server process memory percent	Get errors	App CPU billed	

<b>Availability status detailed</b>	<b>Connections active</b>	<b>IO consumption percent</b>	<b>Network in</b>
<b>Memory utilization</b>	<b>Connections aborted</b>	<b>Availability state</b>	<b>Network out</b>
<b>Storage percent</b>	<b>Storage used</b>	<b>Get errors</b>	
<b>Storage limit</b>	<b>Server log storage used</b>	<b>Percentage CPU</b>	
<b>Backup storage used</b>	<b>Server log storage percent</b>	<b>CPU credits remaining</b>	
<b>Replication lag</b>	<b>Server log storage limit</b>	<b>CPU credits consumed</b>	
<b>Queries</b>	<b>Connections failed</b>	<b>Connections total</b>
