CERNE™ · THE INDUSTRY'S MOST COMPREHENSIVE CLOUD MANAGEMENT PLATFORM

Intelligence Layer

Context-aware AI for autonomous operations. Private or bring-your-own LLMs, knowledge graphs, an AI assistant, deep research, a reasoning engine and predictive intelligence, with stateful analytics from every Cerne™ module.

The AI assistant answering network, incident and cost questions in plain language.

INTELLIGENCE LAYER

What this layer does

Private LLM / BYO LLM
Secure enterprise models with data sovereignty and isolation.

Knowledge and context
Knowledge graphs, service topology and context enrichment.

AI assistant
Natural-language queries and conversational analytics.

AI query deep research
Multi-step reasoning, root cause and data correlation.

Reasoning and analysis engine
Decision intelligence across domains.

Predictive intelligence
Forecasting, anomaly prediction and recommendations.

Multicloud stateful analytics

Stateful insight drawn natively from every module:

DCIM · AIOps · FinOps · GreenOps · Hybrid cloud management · DevSecOps

What it delivers

Insights
Answers in context.

Predictions
Forecasts and anomaly prediction.

Recommendations
Next-best actions.

Forecast and planning
Capacity, cost and carbon.

Knowledge discovery
Across every domain.

Classification
Events, assets and issues.
