CERNE™
Agentic Cloud Management

UNITYONE AI DELIVERS CERNE™

Your entire IT operation. One intelligent platform.

★ The industry's most comprehensive cloud management platform

An Agentic Cloud Management Platform to discover, monitor, manage, and autonomously operate hybrid and multicloud. Cerne™ brings data centers, private clouds and public clouds into one view, and uses AI agents to keep them running.

Data centers, private clouds and public clouds on one dashboard.

50+
Siloed tools replaced
One AI-driven control plane.

40–60%
Lower operational overhead
Published UnityOne AI range.

3x
Engineering productivity
With agents that execute around the clock.

WHY IT MATTERS

IT has outgrown its tools

Most IT teams run dozens of separate tools for monitoring, cost, provisioning, data centers and sustainability. Alerts pile up, costs are hard to explain, and skilled engineers spend their days switching screens.

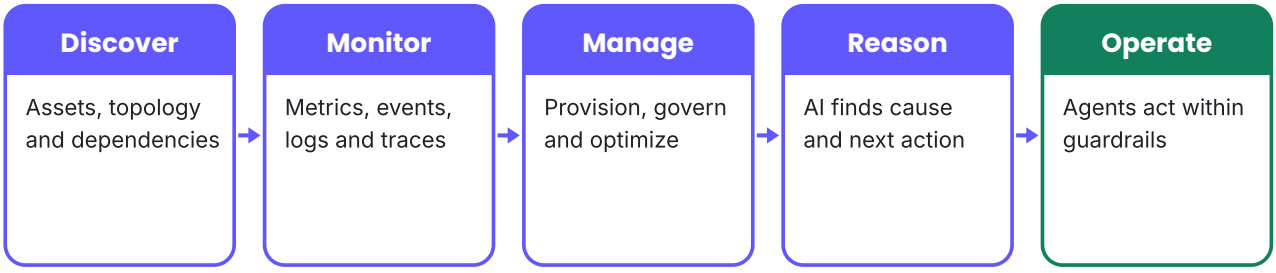

Without Cerne™

- 50+ tools, consoles and contracts
- Thousands of alerts and no clear cause
- Cloud bills nobody can explain
- The same fixes done by hand
- Too few specialists for everything

With Cerne™

- One platform for every site and cloud
- A few clear incidents with the cause shown
- Every cost visible and owned
- AI agents that fix routine issues
- Plain-English answers for everyone

From discovery to autonomous operation

What Cerne™ replaces

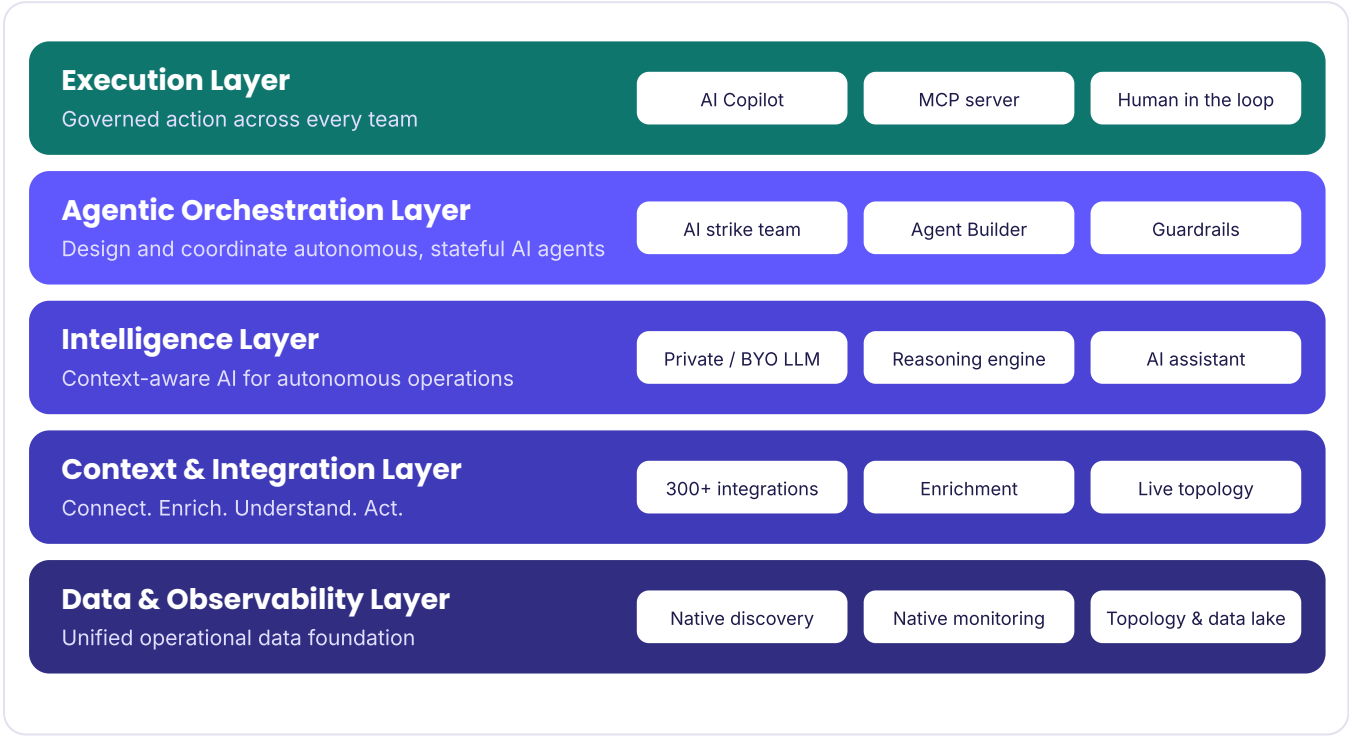

Discovery & CMDB · Infrastructure monitoring · Network monitoring · Storage monitoring · Kubernetes · Log analytics · Event correlation · Runbook automation · ITSM connectors · Patching · Network config · Self-service portal · Policy engine · Workflows · Cloud cost · Chargeback · Budgeting · Capacity planning · Asset register · Rack & power · Sensors · Topology · Carbon accounting · Energy & PUE · Reporting · AI chatbot

HOW CERNE™ WORKS

Five layers, from data to action

Each layer builds on the one below it, so every decision starts from complete, connected data.

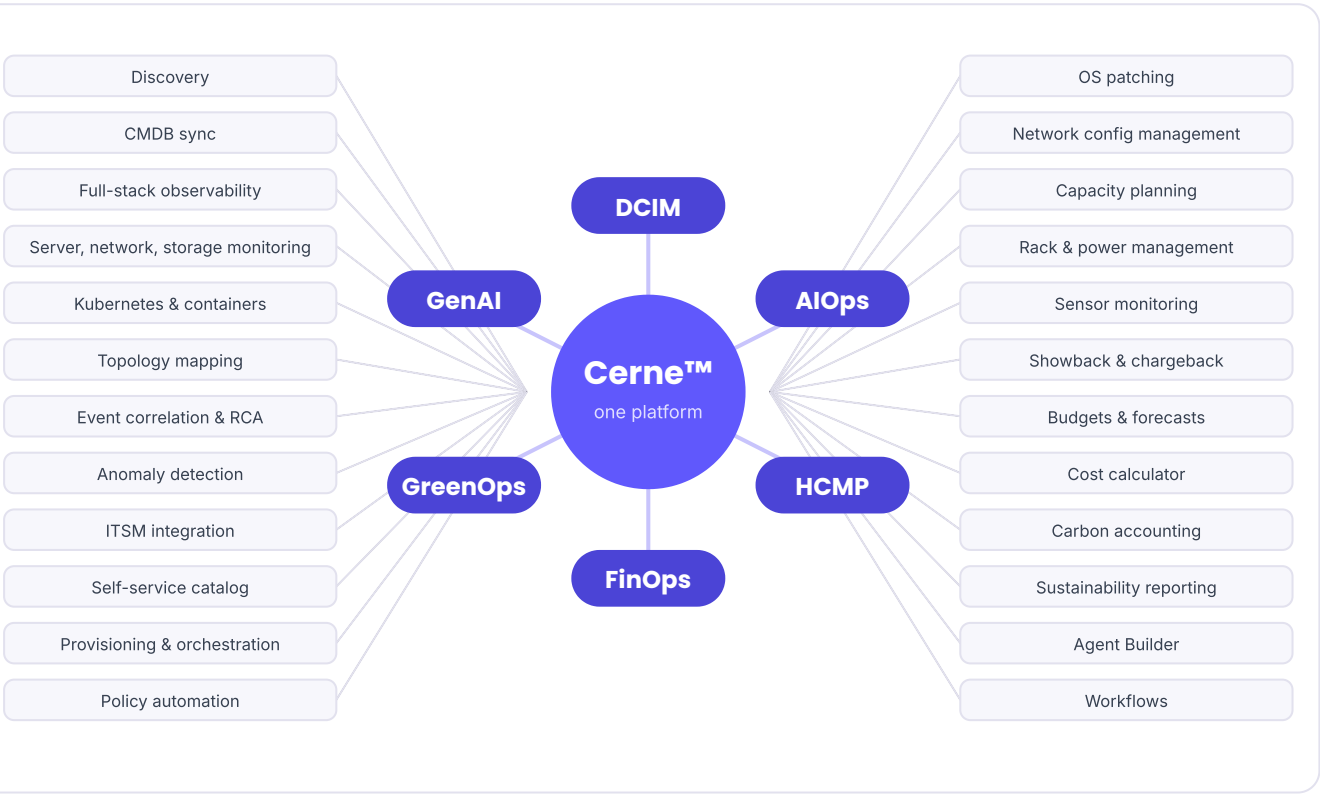

Layer	In plain words
Execution	Agents and people act safely, with approval for anything sensitive.
Agentic orchestration	A team of AI agents plans and coordinates the work.
Intelligence	AI understands what is happening and what to do next.
Context & integration	Data is connected and enriched, so it makes sense.
Data & observability	Everything is discovered and monitored in one place.

MOST COMPREHENSIVE

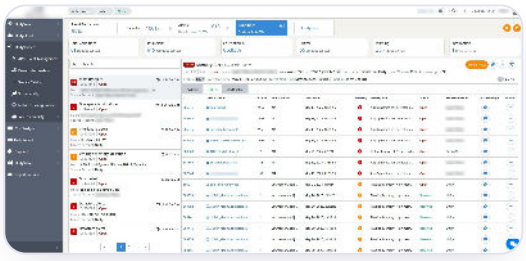

The industry's most comprehensive cloud management platform

Six major modules, DCIM, AIOps, HCMP, FinOps, GreenOps and GenAI, plus discovery, CMDB, observability and two dozen more capabilities, all on one platform.

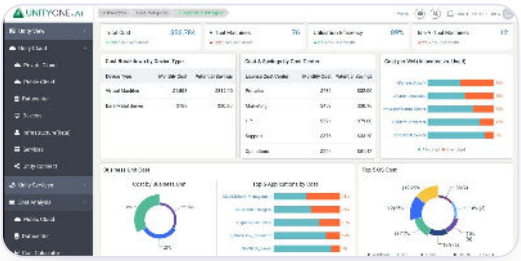

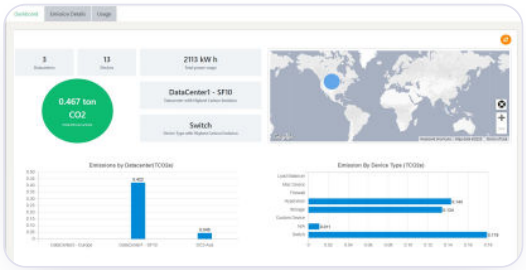

DCIM: racks, devices and power.

AIOps: alerts correlated into incidents.

FinOps: cost, efficiency and idle resources.

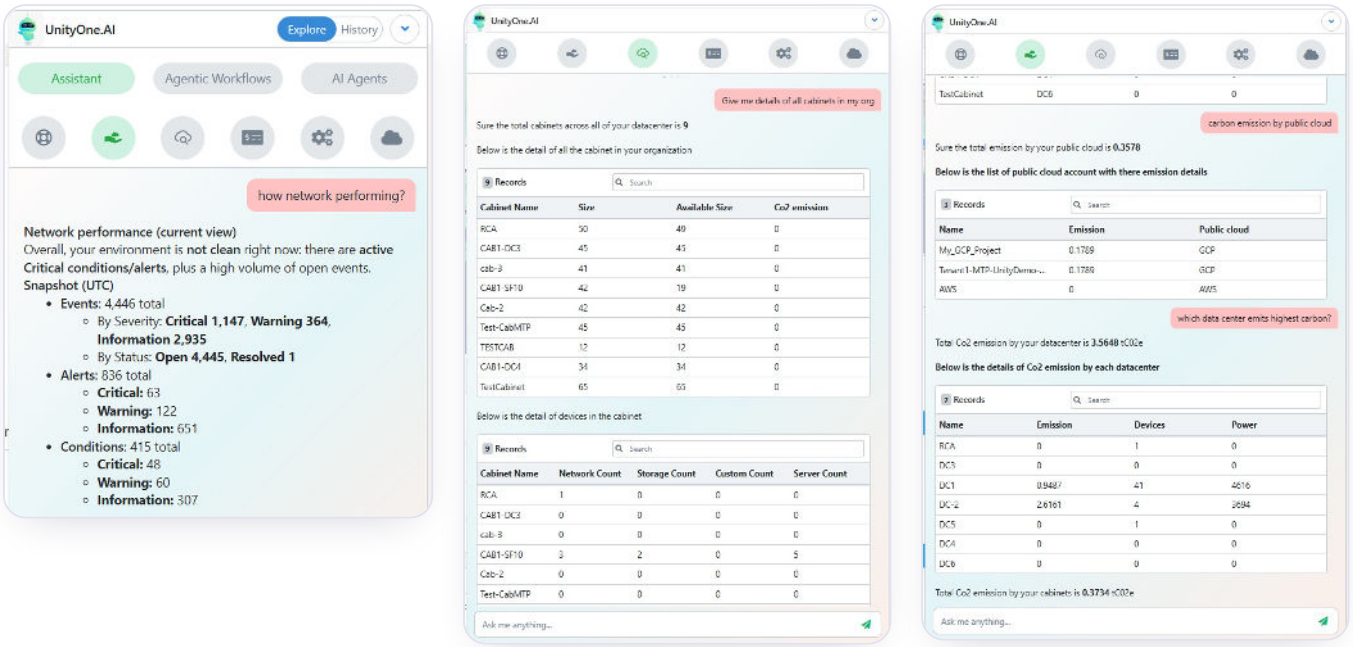

GreenOps: carbon by data center and device type.

ASK IN PLAIN ENGLISH

An AI coworker for every operator

Ask how the network is performing, which cabinets have space, or where carbon comes from, and get the answer in seconds.

Network health, cabinet capacity and carbon by data center, from one assistant.

No specialist skills
Anyone can ask.

Private by design
Runs on a private or your own LLM.

Across every module
One assistant, all your data.

Questions people ask every day

- How is the network performing?
- Give me details of all cabinets in my org
- Give me top noisy hosts
- What is the current month's cost of Azure Cloud?
- Which data center emits the highest carbon?
- Was my last discovery scan successful?

AGENTS THAT ACT

An AI strike team for IT operations

Specialized AI agents detect problems, investigate, decide what to do, act, and check the result, within the limits you set.

NOC agent
Incident detection and response.

SOC agent
Threat hunting and remediation.

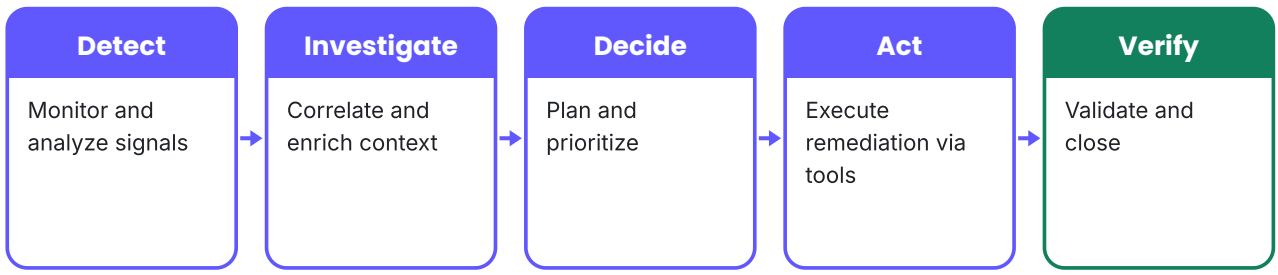

CloudOps agent
Scaling, healing and drift management.

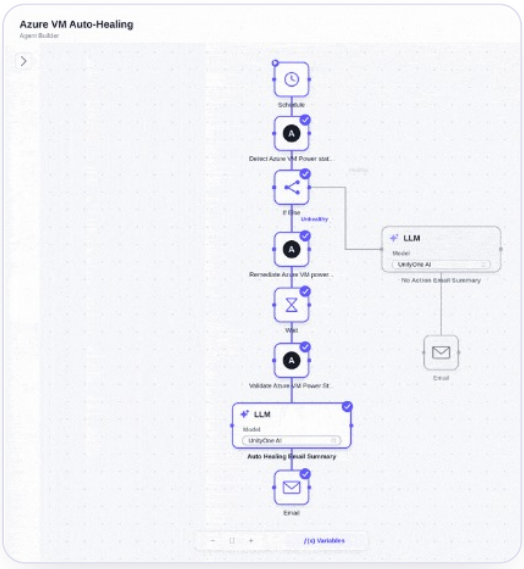

FinOps agent
Cost optimization.

Patching agent
Vulnerability remediation.

Custom agent
Build your own.

How an agent handles a problem

An Azure VM auto-healing agent built in the Agent Builder.

100+ prebuilt workflows
Ready to use from day one.

Build your own
A low-code Agent Builder.

You stay in control
Approval for sensitive changes.

WHO BENEFITS

One platform for every team

IT OPERATIONS

Fewer alerts, faster fixes and routine work handled by agents.

DEVOPS

Self-service provisioning and workflows across clouds.

SECURITY

Patching and threat response with audit trails.

FINOPS

Every cost visible, allocated and optimized.

SUSTAINABILITY

Carbon and energy by site, device and cloud.

BUSINESS LEADERS

One view of risk, cost and progress.

Safe by design

Private or your own LLM
Data sovereignty and isolation.

Human in the loop
People approve sensitive actions.

Guardrails, audit and RBAC
Every action controlled and logged.

100+
Prebuilt agentic workflows

300+
Integrations

350+
Global customers

10+
Global points of delivery

Getting started

STEP 1

Explore

Try Cerne™ in the UnityOne AI Playground.

STEP 2

Connect

Discover your sites and clouds.

STEP 3

Automate

Turn on agents with the approvals you choose.

PROOF

Trusted by organizations worldwide

> **Leader and Outperformer, GigaOm Radar for Cloud Management Platforms 2025.** *"UNITYONE.AI stands out as a comprehensive cloud management platform by bridging on-premises automation with multicloud orchestration."*

Customer stories

Customer	What Cerne™ delivered
Enterprise ITOps team	Up to 85% of L1/L2 incidents resolved autonomously; 20–30% lower MTTR; ~70% less alert noise.
European logistics company	Unified FinOps across ~2,000 resources; 25–35% cloud-cost savings.
Global utility company	Remote management of globally distributed data center assets, with carbon analysis.
Global machinery manufacturer	Siloed monitoring replaced with unified, correlated AIOps and auto-ticketing.
European digital services provider	Carbon footprint, recommendations and ESG reporting across global IT.
