CERNE™ DCIM BY UNITYONE AI

AI-powered Data Center Infrastructure Management

See every asset, rack and watt across your data centers and clouds, then hand routine work to an AI coworker that acts within your rules.

One dashboard for data center, private cloud and public cloud assets.

~40%
More usable capacity

15–30%
Idle infrastructure eliminated

15–40%
Lower carbon footprint

CUSTOMER STORY

A Tier III colocation operator recovered ~40% of stranded capacity

Live, outlet-level power data and scenario planning let the operator use existing space, power and cooling more effectively, and defer multi-million-dollar build or lease spend.

~40%
capacity recovered

15–25%
better utilization

Up to 25%
less planning time

~15–20%
lower energy use

WHAT YOU CAN DO

Key capabilities

Agentless discovery
Find every compute and non-compute asset, with no agents to install.

Remote rack management
Front and rear cabinet views, heatmaps, power and free space.

Environmental monitoring
Temperature, humidity and airflow from rack PDU sensors.

Forecast & optimize
Predict capacity, control bandwidth costs and right-size resources.

Automate & govern
Policies, configuration backups, OS patching and workflows.

AI coworker
Ask in plain English and delegate work to AI agents, with approvals.

HOW IT WORKS

1 · DISCOVER

Find everything

Agentless discovery maps devices, racks, power and clouds.

2 · SEE

Monitor and plan

Live dashboards, topology, analytics and forecasts.

3 · ACT

Automate and delegate

Policies, workflows and AI agents, with your approval.
