AI COWORKER & AGENT BUILDER

Delegate operations to AI, on your terms

Built into the DCIM dashboard, the LUMI™ AI copilot lets you ask, automate, resolve or launch AI agents from one conversational interface, with human-in-the-loop (HITL) governance, whatever your level of infrastructure expertise.

Illustrative conversation.

Agent Builder: an Azure VM auto-healing agent.

20–30%
Reduced time to resolution

40–60%
Reduced manual overhead

~90%
Routine operations automated

WHAT YOU CAN DO

Key capabilities

Ask in plain English
Questions, reports, forecasts and recommendations from live data.

Prebuilt specialized agents
For network, compute, database, FinOps and ITSM.

Agent Builder
Create and customize agents with a no-code or low-code model.

Orchestration engine
Coordinate multi-agent workflows across hybrid and multicloud.

Governed within guardrails
Policy-driven automation with human-in-the-loop oversight.

Always stateful
Agents work with full infrastructure context, not isolated prompts.

Built-in safeguards

- You approve what matters before it runs
- Agents act only within predefined policies and permissions
- Runs in a private AI environment
- Role-based access and a full audit trail of every action
