AUTOMATION & GOVERNANCE

Automate and govern with confidence

Policies, network configuration backups, OS patching and composable workflows that run within your rules, connected to the ITSM and DevOps tools you already use.

Composable workflow: approve in BMC Helix, provision a VM in Azure, then create a user on AWS.

~90%
Routine operations automated

40–60%
Reduced manual overhead

7
Integrations out of the box

WHAT YOU CAN DO

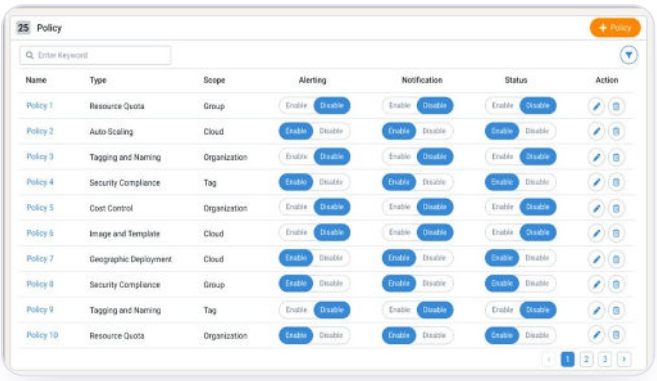

Key capabilities

Policy-driven automation
Auto-scaling, resource quotas, tagging, compliance and cost control.

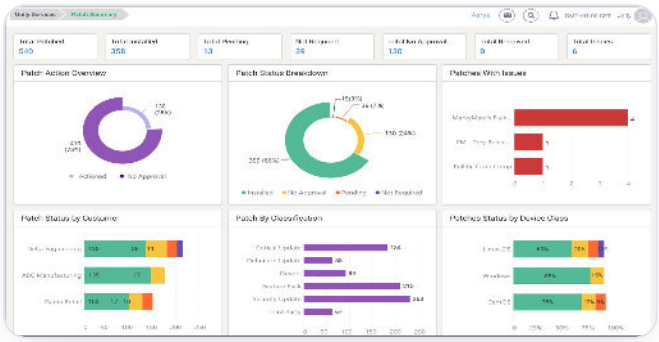

Network configuration
Back up every configuration and compare versions to spot drift.

OS patching
Patch status and compliance across Windows and Linux servers.

Integrations
ServiceNow, BMC Helix, Jira, ManageEngine, Ansible, Terraform, Jenkins.

Policies

Patch summary

WHY IT MATTERS

Consistent governance
Policies apply everywhere, automatically.

Less manual work
Workflows run approvals, provisioning and patching.

Audit-ready
Configuration history, patch compliance and logs.
