INDUSTRY USE CASE · BANKING & FINANCIAL SERVICES

Keep critical services up and audits simple

Banks and insurers run payment, trading and core banking platforms where minutes of downtime matter and every change must be traceable. UnityOne DCIM gives one governed view of the data center and hybrid cloud estate.

One dashboard across data center, private cloud and public cloud.

The challenge

- Many tools and teams across data centers, DR sites and clouds
- Strict change control and audit requirements
- Alert noise that slows incident response
- Pressure to report on energy and ESG

How UnityOne DCIM helps

- One inventory and topology across primary, DR and cloud
- Correlated alerts that point to the root cause
- Policies, approvals and a full audit trail on every action
- Configuration backups and OS patch compliance by server

CAPABILITIES USED

Primary and DR topology
See how primary and disaster recovery sites connect.

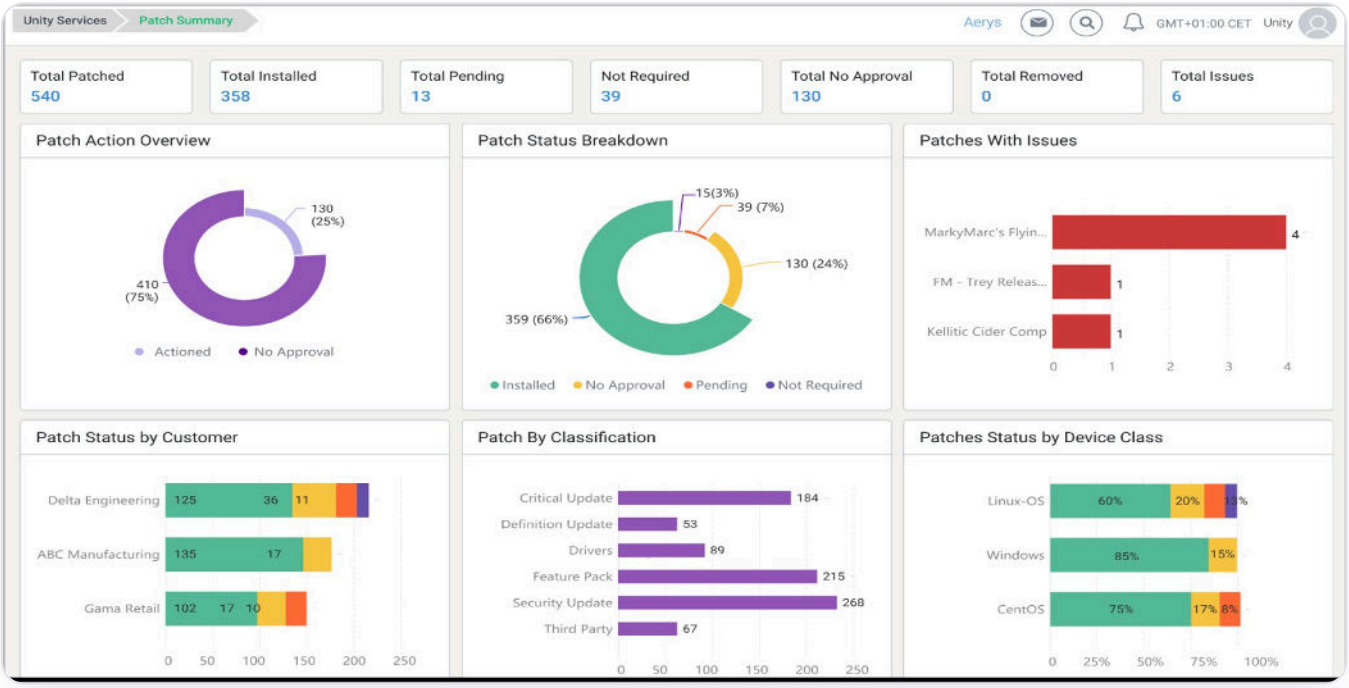

Policy-driven governance
Quotas, tagging, compliance and cost policies, applied everywhere.

ITSM & change automation
ServiceNow and BMC Helix approvals, tickets and CMDB sync.

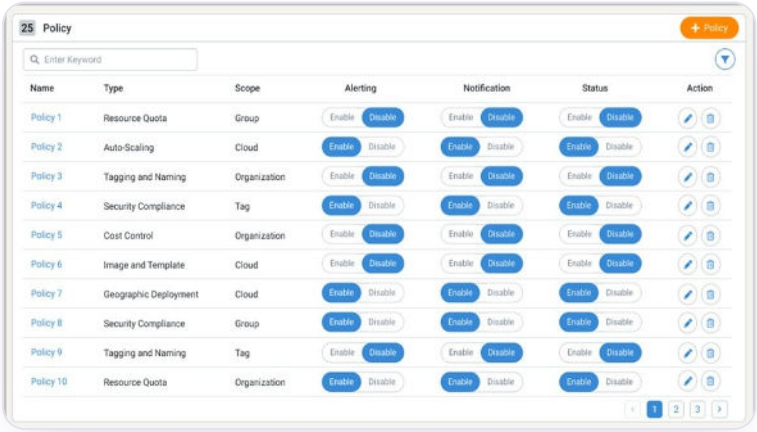

OS patch compliance
Patch status by server, classification and OS.

RBAC & audit visibility
Role-based access and a record of every action.

AI with human approval
Agents act only after the right person approves.

Patch summary: compliance by customer, classification and OS.

Policies with alerting, notification and status per scope.

EXPECTED OUTCOMES

What teams can expect

20–30%
Reduced time to resolution

40–60%
Reduced manual overhead

~90%
Routine operations automated

Ranges are UnityOne AI published DCIM impact figures from unityone.ai. Actual results depend on each environment. This sheet describes a typical scenario; it is not a specific customer result.

WHY UNITYONE

Governed by design
Policies, approvals and RBAC on every action.

Audit-ready records
Change history, configuration backups and patch status.

Hybrid in one view
Primary, DR, private and public cloud together.

GETTING STARTED

STEP 1
Explore
Try DCIM hands-on in the UnityOne AI Playground.

STEP 2
Discover
Run agentless discovery on a site and see it on one map.

STEP 3
Expand
Roll out to every site, cloud and team at your pace.
