UNIFIED MULTICLOUD COST VISIBILITY

Every cloud, every data center, one cost view

Aggregate live cost, usage and efficiency data across AWS, Azure, Google Cloud, Oracle, private clouds and bare metal into a real-time single pane of glass.

Public cloud summary: month-to-date and trailing twelve months per cloud, monthly cost breakdown and average cost by cloud.

100%
Unified cost visibility

25–35%
Lower cloud costs

2–3x
Faster financial and engineering decisions

The problem it solves

- A separate billing console for every cloud
- No single number for what IT really costs
- Private cloud and data center costs left out

WHAT YOU CAN DO

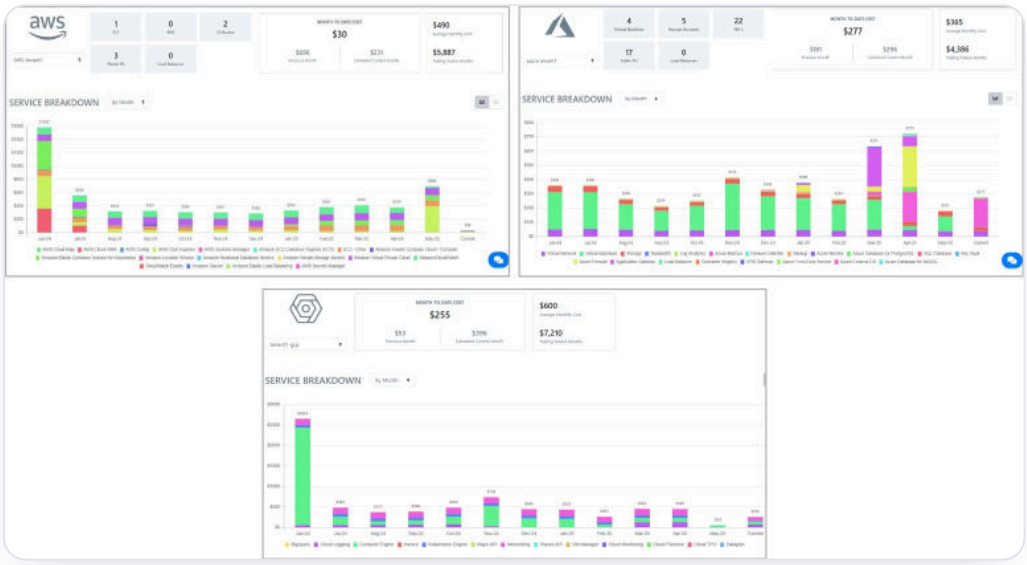

Key capabilities

All public clouds
AWS, Azure, Google Cloud and Oracle side by side.

Private and data center
VMs, containers and bare-metal infrastructure.

Service breakdown
Monthly cost by service for every account and tenant.

Month-to-date view
Previous month, estimated current month and trailing twelve months.

Service breakdown by month for AWS, Azure and Google Cloud tenants.

WHY IT MATTERS

One version of the truth
Every cost in one place.

Real time
Not a month-end surprise.

Hybrid by design
Cloud and on-premises together.
