GENAI FOR DCIM

Ask your data center anything

Bring intelligence to data center management: monitor, analyze and optimize physical infrastructure with natural-language questions, from device counts to cabinet capacity and storage use.

Device inventory by type and status, storage devices above 60% used, and every cabinet with size, free space and devices.

Seconds

From question to inventory answer

Every site

All data centers in one conversation

Charts

Distribution by type, site and status

The problem it solves

- Inventory spread across spreadsheets and consoles
- Capacity questions that take a site visit or a ticket
- Too few experienced data center engineers

WHAT YOU CAN DO

Key capabilities

Instant data center insights
Devices, cabinets, storage and status in seconds.

Reports by asking
Tables and charts generated from natural-language queries.

Proactive alerts and recommendations
Know what needs attention before it fails.

Cabinet and capacity detail
Size, free space and device counts per cabinet.

Questions you can ask

- Show me all devices there are in my organization
- Show me storage devices that have consumed more than 60% space across all data centers
- Give me details of all cabinets in my org
- How many firewalls are up or down?

WHO IT HELPS

Data center operators
Capacity and status on demand.

Remote hands teams
Know the cabinet before arriving.

IT managers
Inventory reports without waiting.
