GENAI FOR HYBRID CLOUD MANAGEMENT

Your whole cloud estate in one conversation

The UnityOne AI assistant turns hybrid cloud management into a conversation. From private clouds to public cloud data, get real-time metrics and reports without navigating complex dashboards.

Public cloud accounts and Azure services, the service catalog, and recently provisioned VMs.

Every cloud

Private and public in one answer

Seconds

From question to inventory

Self-service

Guidance for new team members

The problem it solves

- Dashboards for every cloud and every tool
- New staff who do not know where to look
- Status questions that interrupt senior engineers

WHAT YOU CAN DO

Key capabilities

Multicloud visibility
Private and public clouds in one place.

Insights and actions
On cloud resources and services.

Status and utilization
Instant details for any resource.

How-to guidance
Step-by-step help, for example creating a workflow.

Questions you can ask

- How many public clouds are available in my organization?
- What services are available in the service catalog?
- Show me the 10 most recent VMs provisioned
- Was my last discovery scan successful?

WHO IT HELPS

Cloud engineers
Inventory and status instantly.

Service desk
Catalog answers for users.

New team members
Guided how-to help.
