ILLUSTRATIVE SUCCESS STORY · PUBLIC SECTOR & GOVERNMENT

A public agency does more with a small IT team

A government agency runs its own data centers and a small public cloud estate with a lean team. The UnityOne AI assistant gives every team member answers on status, cost and carbon, and keeps data inside the agency.

WHY GENAI FITS PUBLIC SECTOR & GOVERNMENT

Public sector IT teams are often small, must keep data sovereign, and face growing demands for cost transparency and sustainability reporting. A private assistant that answers in plain language and produces reports on request helps a lean team keep up.

THE ORGANIZATION

A government agency with two data centers, a private cloud and accounts on two public clouds, run by a small infrastructure team that also prepares cost and sustainability reports for leadership.

The challenge

- A lean team covering data centers and clouds
- Budget and cost questions from leadership every month
- Sustainability data requested for public reporting
- Data that must stay under the agency's control

What they did with UnityOne AI

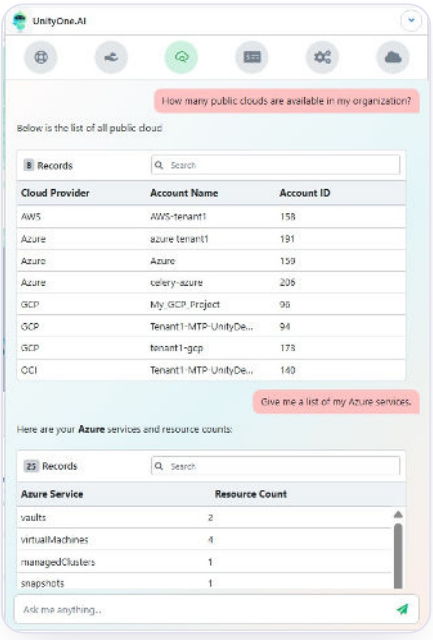

- Brought data centers, private cloud and public clouds into Cerne™
- Deployed the assistant on a private LLM
- Used it to answer cost and carbon questions for leadership
- Turned recurring report requests into simple questions

A DAY WITH THE AI COWORKER

Questions that used to take hours

When	Who	They ask	They get
08:30	Infrastructure lead	“How many public clouds are available in my organization?”	Cloud providers and accounts in one table
10:15	Finance officer	“Give me service-wise cost for Azure”	Service costs with a chart
14:00	Sustainability officer	“Give complete carbon emission details”	Total CO_2 with split by data center and cloud
16:30	Engineer	“Show me the 10 most recent VMs provisioned”	Recent VMs and who requested them

Cloud accounts, service-wise cost and total carbon emissions.

THE OUTCOME

What changed for the team

A small team, covered
Every member can answer questions across domains.

Reports on request
Cost and carbon figures for leadership.

Data sovereignty
A private LLM inside the agency's environment.

Sustainability visibility
Emissions by site and cloud.

Illustrative success story: a composite scenario showing how teams in this industry use the UnityOne AI assistant. It is not a named customer, and outcomes are described qualitatively, not measured results.

WHY UNITYONE

Private by design
Data stays with the agency.

Every domain
DCIM to GreenOps.

Simple to use
No specialist skills needed.

GETTING STARTED

STEP 1

Ask

Try the assistant in the UnityOne AI Playground.

STEP 2

Connect

Link your data centers, clouds and monitoring.

STEP 3

Delegate

Hand routine tasks to agents, with approvals.

GET STARTED

Meet your AI coworker

Ask the UnityOne AI assistant your own DCIM, AIOps, FinOps and GreenOps questions in the Playground, or talk to our team about bringing it to your operations.
