CARBON ANALYTICS & REPORTING

Granular carbon analytics, ready for executives

Visualize emissions by site, cloud, region, device, OS, manufacturer and department, and generate customized sustainability reports for tracking and audits.

GreenOps analytics: emissions by region, OS, model, manufacturer, department, year and quarter.

15–40%
Reduction in carbon footprint
Published DCIM impact range.

~15–20%
Lower energy consumption
Tier III colocation case study.

Scope 1–3
Emissions accounting
Attributed down to the workload.

The problem it solves

- ESG reporting built by hand from many sources
- Numbers that cannot be traced back to assets
- No trend view to show progress toward targets

WHAT YOU CAN DO

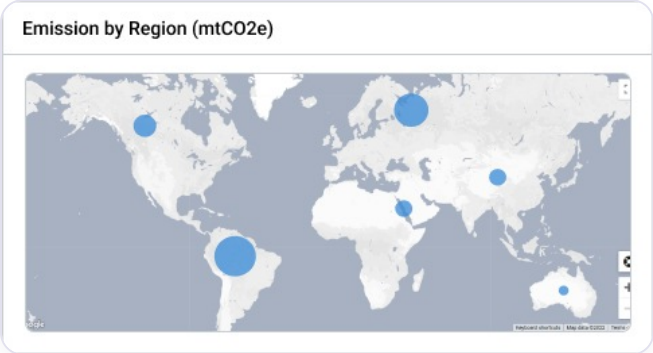

Key capabilities

Granular analytics
Slice emissions by any dimension you track.

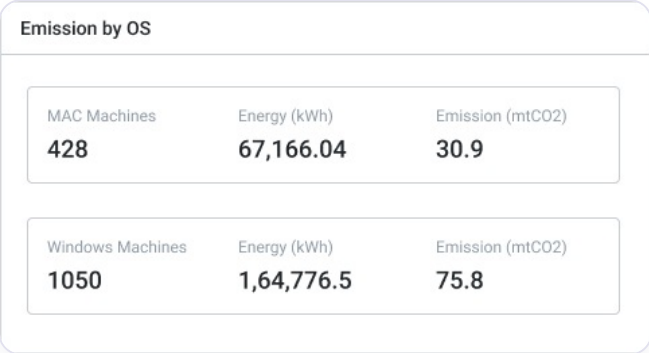

Executive dashboards
One dashboard for all hybrid cloud emissions.

Custom reports
Reports built for sustainability tracking and ESG.

Import from files
Onboard assets from .csv files to include them too.

Emissions by region

Emissions by operating system

WHY IT MATTERS

Audit-ready
Every number traces back to an asset.

Less manual work
Reports generated, not assembled.

Show progress
Trends by year and quarter.
