GENAI SUSTAINABILITY ASSISTANT

Ask about your carbon footprint in plain English

The UnityOne AI assistant answers sustainability questions from live data: total emissions, which data center emits most, and the split by cloud and service.

The UnityOne AI assistant answering carbon questions across data centers, private clouds and public clouds.

15–40%
Reduction in carbon footprint
Published DCIM impact range.

~15–20%
Lower energy consumption
Tier III colocation case study.

Scope 1–3
Emissions accounting
Attributed down to the workload.

The problem it solves

- Sustainability data locked in specialist dashboards
- Slow answers for leaders and auditors
- Few people able to query emissions data

WHAT YOU CAN DO

Key capabilities

Instant answers
"Which data center emits the highest carbon?"

Cloud breakdowns
Emissions by public cloud account and service.

Charts on demand
Pie charts and tables generated in the conversation.

Private and governed
Private LLM with role-based access.

Questions you can ask

- Give me complete carbon emission details
- Carbon emission by public cloud
- Which data center emits the highest carbon?
- Give me carbon emission details for GCP

WHY IT MATTERS

Anyone can ask
No dashboards or query skills needed.

Faster reporting
Answers in seconds.

Same trusted data
Built on the GreenOps model.
