INDUSTRY USE CASE · BANKING & FINANCIAL SERVICES

Disclosure-ready IT emissions, from data center to desk

Banks and insurers face growing climate disclosure requirements. UnityOne GreenOps gives traceable Scope 1, 2 and 3 data across data centers, clouds and thousands of end-user devices.

End-user device emissions by model, uptime and year.

The challenge

- Climate disclosure requirements with tight deadlines
- Large fleets of end-user devices across branches
- Hybrid estates with primary and DR sites
- Numbers that are hard to trace back to assets

How UnityOne GreenOps helps

- Scope 1, 2 and 3 accounting traced to assets
- End-user device emissions by branch and department
- Policy-as-code, approvals and audit trails
- Custom reports for ESG and auditors

EXPECTED OUTCOMES

What teams can expect

Scope 1–3
Emissions accounting

15–40%
Reduction in carbon footprint

1
View for all IT emissions

Figures are UnityOne AI published ranges from unityone.ai (DCIM impact and Tier III colocation case study). Actual results depend on each environment. This sheet describes a typical scenario; it is not a specific customer result.

WHY UNITYONE

Audit-ready
Every number traced to an asset.

Complete scope
Sites, clouds and devices.

Governed
Approvals and audit trails.

GETTING STARTED

STEP 1
Explore
Try GreenOps in the UnityOne AI Playground.

STEP 2
Measure
Connect one site and one cloud to set a baseline.

STEP 3
Reduce
Act on recommendations and track results.
