INDUSTRY USE CASE · GOVERNMENT & PUBLIC SECTOR

Meet net-zero targets with evidence

Public bodies must cut emissions and prove it, often with aging sites and tight budgets. UnityOne GreenOps shows where carbon comes from and which actions cut it most.

Emissions by region.

The challenge

- Net-zero targets with limited data
- Aging data centers and legacy hardware
- Tight budgets for modernization
- Public accountability for every claim

How UnityOne GreenOps helps

- A live baseline across sites, clouds and devices
- Recommendations to retire legacy and unused assets
- Scenario planning before investment
- Reports and audit trails for public reporting

CAPABILITIES USED

Recommendation engine
Retire legacy hardware and consolidate.

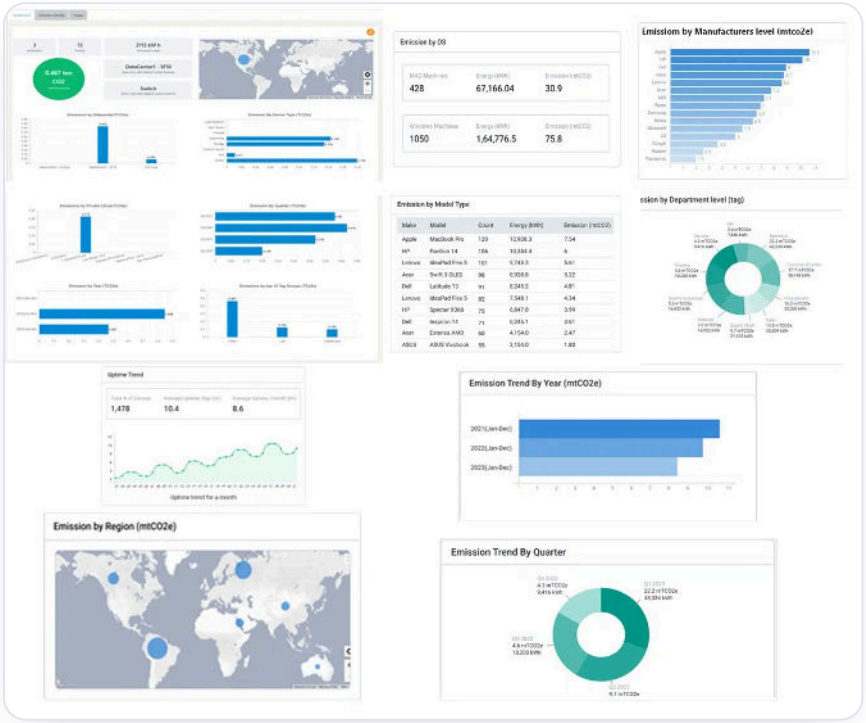

Scenario planning
Test changes before you commit budget.

Cloud migration advice
Move workloads where it cuts carbon.

Public reporting
Custom sustainability reports.

On-premises option
Run within your own environment.

Audit trails
Evidence for every reported reduction.

GreenOps analytics across many dimensions.

EXPECTED OUTCOMES

What teams can expect

15–40%
Reduction in carbon footprint

~15–20%
Lower energy consumption

Scope 1–3
Emissions accounting

Figures are UnityOne AI published ranges from unityone.ai (DCIM impact and Tier III colocation case study). Actual results depend on each environment. This sheet describes a typical scenario; it is not a specific customer result.

WHY UNITYONE

Evidence-based
Every reduction measured.

Budget-smart
Highest-impact actions first.

Deploy your way
On-premises or SaaS.

GETTING STARTED

STEP 1
Explore
Try GreenOps in the UnityOne AI Playground.

STEP 2
Measure
Connect one site and one cloud to set a baseline.

STEP 3
Reduce
Act on recommendations and track results.
