AI-BASED FINOPS AUTOMATION & INTELLIGENCE

Turn cost data into governed action

UnityOne AI combines financial, operational, workload, utilization and business context to identify the next best action, explain its expected impact and automate approved remediation.

Cloud cost by provider and account: month-to-date, estimated cost and resources.

100%

Unified cost visibility

Across public, private, Kubernetes and SaaS.

25–35%

Potential cloud cost reduction

UnityOne FinOps published figure.

2–3x

Faster financial decisions

UnityOne FinOps published figure.

The problem it solves

- Cloud bills that grow without explanation
- Reports that show cost but not the next action
- Idle and oversized resources nobody owns

WHAT YOU CAN DO

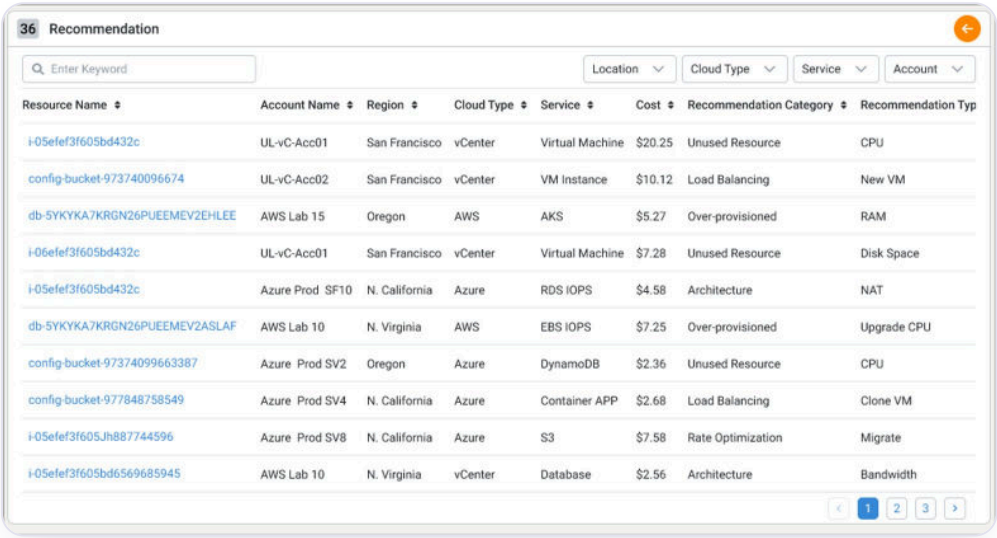

Key capabilities

Intelligent anomaly detection
Spot unusual spend as it happens.

AI-assisted forecasting
Predict spend from current trends.

Next-best-action recommendations
Rightsizing and idle resource fixes, with expected impact.

Automated cost remediation
Apply approved fixes with governance.

Recommendations with account, region, cloud, service, cost and action.

WHY IT MATTERS

Explainable
Every recommendation shows its expected impact.

Accountable
Costs allocated to teams, products and services.

Actionable
Approved fixes run automatically.
