AGENTIC ORCHESTRATION & DEVOPS AUTOMATION

Design, deploy and run governed agentic workflows

Orchestrate multi-agent, cross-domain workflows that automate provisioning, configuration, remediation and change, across your clouds and on-premises environments.

Workflow: approve in BMC Helix, provision a VM in Azure, then create a user on AWS.

90%
Routine L1/L2 tasks automated

2–3x
Higher engineering productivity

50–60%
Lower operational overhead

WHAT YOU CAN DO

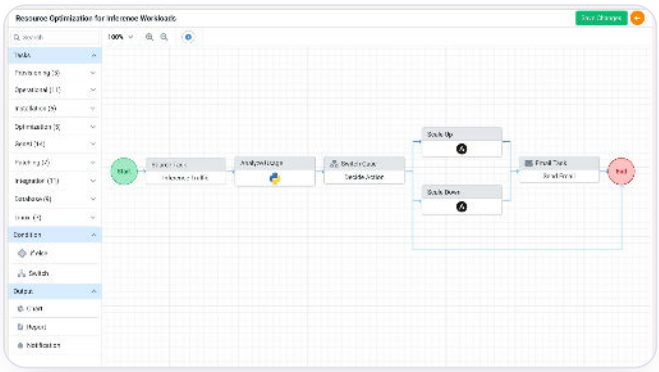

Key capabilities

Multi-agent workflows
Cross-domain workflows built visually and reused as governed agents.

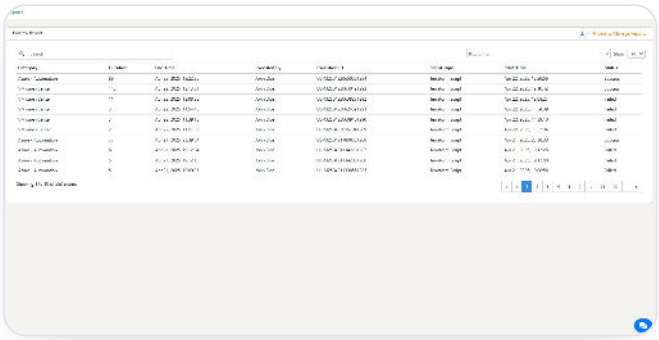

Ready-made tasks
Provisioning tasks for VMware vCenter, Azure, GCP and more.

Event-driven automation
For example, CPU above 80% triggers scaling.

DevOps tooling
Ansible, Terraform and scripts in Python, Shell and Bash.

Auto-scaling workflow: analyze usage, then scale up or down

DevOps automation reports

WHY IT MATTERS

Less toil
Agents handle repetitive provisioning and remediation.

Policy-controlled
Every workflow runs within your guardrails.

Reusable
Build once, run across every cloud.
