MULTICLOUD DISCOVERY & OBSERVABILITY

Every cloud, cluster and data center in one view

AI-powered multicloud discovery brings private clouds, public clouds, Kubernetes and data centers into a single pane of glass, with full-stack observability and event intelligence.

Public clouds side by side: Azure, AWS, Google Cloud and Oracle Cloud with instances, cost and alerts.

50+
Siloed tools consolidated

4
Major public clouds supported

1
Single pane of glass

The problem it solves

- No unified view of workloads, policies or operational actions
- Dozens of siloed tools for each cloud
- Alerts scattered across consoles

WHAT YOU CAN DO

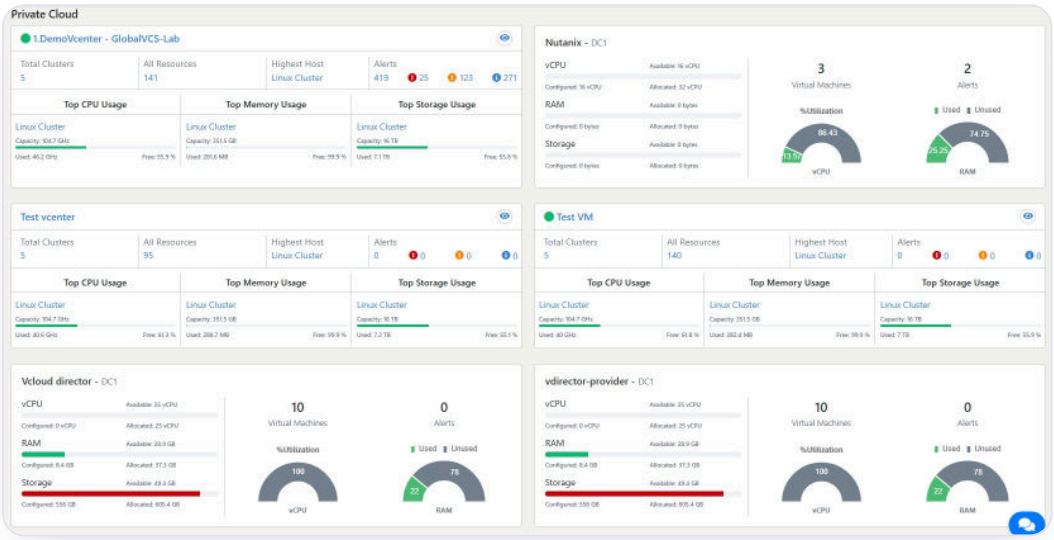

Key capabilities

Public cloud
AWS, Azure, Google Cloud and Oracle Cloud (OCI).

Private cloud
VMware, Nutanix, OpenStack, Proxmox, Azure Stack and Scale Computing.

Kubernetes & containers
Clusters, containers and microservices across clouds.

Event intelligence
AI-driven event correlation, anomaly detection and root cause.

Private cloud summaries with vCPU, RAM and storage utilization.

WHY IT MATTERS

No blind spots
Every resource in every cloud, always current.

Faster answers
Correlated events point to the real cause.

One team view
Cloud, IT and finance share the same data.
